

Workmen's Compensation Risk Survey

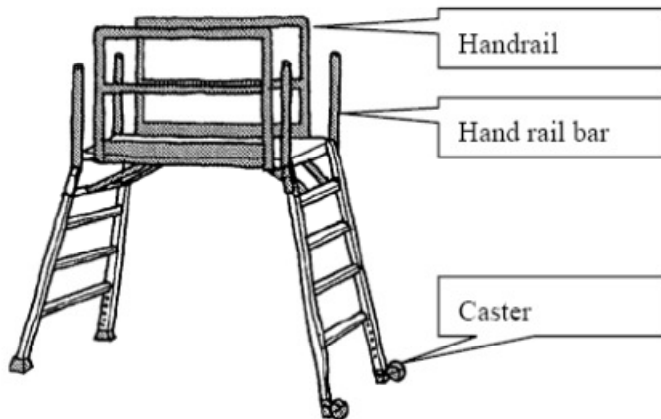

Different with other survey which is more concerned with property, Workmen's Compensation Risk Survey has been focused fully on Human Safety, to avoid any accidents causing bodily injury or death.

Recently Human safety becomes primary culture in many reputable international companies. Increasing productivity and morale of employee become one of goals from safe working place.

Some of rules and standards are used as guidelines to assess, evaluate and recommend the improvement such as: local regulation, OSHA, industrial Best Practice and others.

Gathering information, site survey, and presentation become Simultaneous steps to conduct the survey. The survey will be conducted by our Workmen's compensation expert from Japan, NKSJ Risk Management, Inc.

Below is sample of improvement proposal.

Sample of portable high platform with the handrail and stopper on the wheels.

Cover for the rolling of moving part of machine.
